Patent Box Enablement

Hilco IP's Patent Box Enablement service helps companies unlock valuable tax savings through the UK Patent Box regime by identifying qualifying IP and aligning documentation, revenue streams, and product linkages. Our team works with clients to assess existing patent portfolios, uncover patentable subject matter, and ensure compliance with the technical and financial requirements of the Patent Box.

Whether your company already holds patents or is still developing protectable innovations, our service ensures you are positioned to benefit from available IP tax incentives, while avoiding common pitfalls in documentation and eligibility.

Benefits

Working with Hilco IP on a Patent Box Readiness Review helps maximise the financial return on your R&D investments by identifying overlooked or latent patentable innovations linked to revenue-generating products, mapping existing patents to qualifying income streams in line with UK Patent Box rules, and improving internal processes for documenting R&D activity and product-IP alignment.

We also support the creation or enhancement of the necessary IP documentation and evidence trail required for HMRC compliance, reducing the risk of under-claiming or future tax challenges. The result is a clear, actionable plan to optimise your Patent Box position and potentially generate significant tax savings

Use Cases

- First-Time Claimants: Ensure readiness to make a compliant and maximised Patent Box claim.
- Mature IP Holders: Audit existing IP portfolios to identify additional qualifying patents or gaps.
- Product–Patent Alignment: Map revenue to the correct IP to ensure eligibility and compliance.
- Post-Acquisition: Assess acquired IP for inclusion in future Patent Box claims.
- Innovation Harvesting: Identify innovations from R&D teams that may be patentable and valuable under Patent Box rules.
- Tax Optimisation Strategy: Integrate IP into broader corporate tax planning and R&D recovery strategy.
